

STILECHOICE®
by IHS Door Company

Barn Doors

We've enhanced our Barn Door Collection
with the new Barn Door Specification

Introducing the STILEChoice® Barn Door Specification

Although you can order any of our barn door designs using standard specifications, STILEChoice® now offers our new Barn Door specification. This new specification compliments the large Barn Doors people desire today.

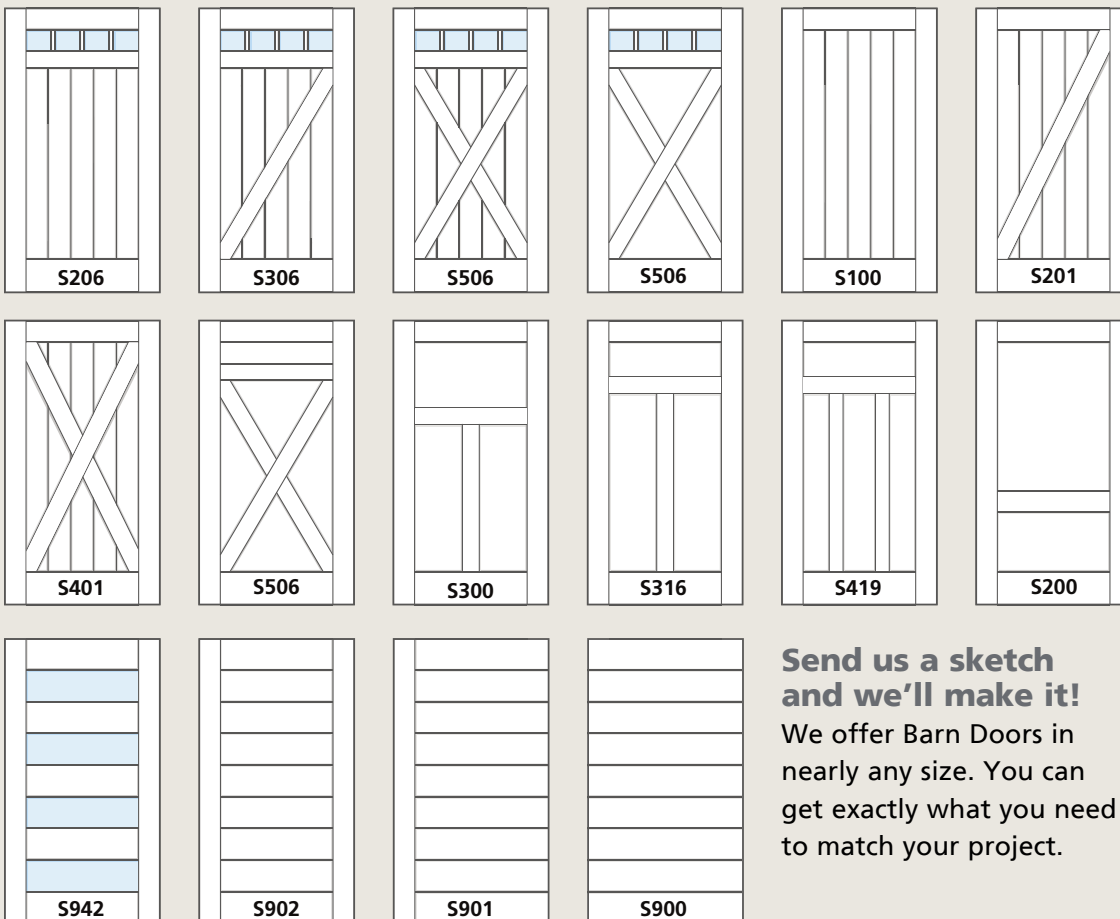

Here's how it works:

We can make a door in any size you need, so you can order a door that properly fits your opening. Depending on your casing width, you would likely want to order a Barn Door 6" wider and 3" taller

than your finished opening. Using the Barn Door Specification, the door — when viewed from the opposite side, in the closed position — the stiles and rails will look normal and proportional, rather than too narrow.

STILEChoice® Barn Door Specification as viewed from the opposite side.

- This is a small sample of available designs.
- All of the doors illustrated here are 4'6" x 8'3"
- Plank doors shown are profile **B47**
- Flat panel doors shown are profile **B20**
- 900 series doors are profile **B80**

STILEChoice® Barn Door Specification

- Stiles and Top Rail: 7³/₈"
- Lock Rail: 7³/₈"
- Cross Rails: 5⁷/₈"
- Bottom Rail: 11¹/₂"

Send us a sketch and we'll make it!

We offer Barn Doors in nearly any size. You can get exactly what you need to match your project.
